

How to install manual pin codes for the BeNext Tag Reader.

- Create a new code name, and a 4~8 digit code. Type the code name and code, and click Set. You will see Waiting for wakeup. Make sure the backplate is placed correctly. Press Home + 1 + enter. It will start communicating with the controller. After a while all the pin codes are set up and you are ready to go.
- Test the Tagreader by either pressing HOME + pincode + enter or AWAY + pincode + enter.

Notice: If the Tag is also used, the #1 code will be occupied by the Tag, that means, the #1 code will be no longer available, when the Tag is used

How to install a Tag for the BeNext Tag Reader?

- Install the app Tag Reader(fig1) <http://apps.mios.com/plugin.php?id=5416>

- After the app is successfully installed, you will find a new device with the 'Learn' icon, see (fig2).

- Type the Device # of the Tag Reader into the box of RFID_Device, see (fig3)

For example, if Device #73, type 73 into RFID_Device, see (fig4)

- Assign pin code to the Tag.(3-5)

Click Learn, when the light icon on, press the key button “Home” of the Tag Reader. when you see its indicator light solid on. close the Tag on to the TagReader to learn the pin code.

Setting up of the TagReader, and its Tag completed
